Extensive post processing and compositing would include adding objects, textures and/or filters to the photo. All images must be original and may not incorporate elements produced by anyone else. Images may not be constructed entirely within a computer and may not use elements produced by anyone other than the entrant, with the exception of artwork or computer graphics if the original photographic content predominates. Note: HDR is not considered Photographic Art.	PA
Monochrome: Uses a single color and white. It does not have to be black and white, but it does have to be limited to <u>one color</u> and white.	MC
General/Open: photos that do not fit in the above categories.	GC

***Note:** Prints may be moved to a category other than the one entered if it is deemed more appropriate by SCC at Check In. Categories may also be combined or eliminated depending on the numbers submitted in each category.

***Post Processing Manipulation:** Photos that are entered into any category above (with the exception of Junior, Beginner or Photographic Art) may not have extensive post processing manipulation which may be obvious to the average viewer. Basic processing such as changes in exposure, clarity, vibrance, saturation, sharpness, removal of distracting items, etc. including HDR is acceptable.
